- **Unpredictable:** The topic or focus is not known in advance.
- **Diverse:** They can span numerous subjects, from science and history to personal preferences and hypothetical scenarios.
- **Brief or Open-ended:** Some random questions are concise, while others require elaboration and explanation.
- **Designed to Test:** Often used to assess knowledge, creativity, or problem-solving skills.

Stay Calm and Think Clearly

Analyze the Question Carefully

- Elaborating with explanations or examples
- Summarizing or concluding if necessary
