Sample Basic Geometry Questions and Answers

Below are examples of typical questions found in a basic geometry questions and answers pdf, along with concise solutions to illustrate the format and content quality one can expect.

- **Question:** What is the area of a triangle with a base of 8 units and a height of 5 units?

Answer: $\text{Area} = \frac{1}{2} \times \text{base} \times \text{height} = \frac{1}{2} \times 8 \times 5 = 20$ square units.

- **Question:** Find the measure of each interior angle of a regular hexagon.

Answer: Each interior angle = $[(n - 2) \times 180^\circ] / n = [(6 - 2) \times 180^\circ] / 6 = 120^\circ$.

- **Question:** Calculate the circumference of a circle with radius 7 units.

Answer: $\text{Circumference} = 2\pi r = 2 \times \pi \times 7 \approx 43.98$ units.

- **Question:** Determine the length of the hypotenuse in a right triangle with legs of 3 units and 4 units.

Answer: $\text{Hypotenuse} = \sqrt{3^2 + 4^2} = \sqrt{9 + 16} = \sqrt{25} = 5$ units.

These examples demonstrate the clarity and practicality of questions and answers typically included in geometry PDFs.
