Budgeting is a fundamental skill emphasized in module 3. Learners are taught to categorize income and expenses, differentiate between needs and wants, and develop spending plans that align with financial goals. The module often includes scenarios that challenge users to make budgeting decisions in realistic contexts, facilitating deeper comprehension.

Saving and Investing

Another crucial area involves educating learners on the importance of saving and the basics of investing. Module 3 introduces concepts such as interest rates, compound interest, and risk versus reward. Understanding these principles helps students appreciate the value of long-term financial planning.
