Ancient Banking Practices

Banking has ancient roots, with early forms appearing in Mesopotamia around 2000 BCE. Temples and palaces served as secure places where people could deposit grain or silver. These rudimentary banks also facilitated loans and currency exchange, laying the groundwork for modern banking systems.

Development of Stock Markets

High-Denomination Banknotes

Some banknotes have reached astonishing face values. Zimbabwe issued a 100 trillion Zimbabwean dollar note in 2008 during hyperinflation. Though worthless in practical terms, such notes have become collector's items and symbols of economic instability.
